

# The 6<sup>th</sup> Grade Hoffkids FRACTION RAP

Dividing fractions  
Don't ask why  
Flip the second one over  
And multiply.

Multiplying fractions  
Is no big problem  
It's top times top  
And bottom times bottom.

To add and subtract  
The fractions you see,  
Make sure the bottom numbers  
Are the same as can be.

Reducing a fraction is  
like cutting lumber,  
Divide the top & bottom  
By the same whole # .

Fractions can be tricky  
But, then once again,  
I tried my very best  
With Mr. Hoffman!
