

Dear Parents:

PARENT MATH LETTER

Another school year is upon us. Sometimes too many days go by before parents and teachers can communicate with each other. I am requesting your help in providing initial information about your child that you think will be helpful for me to know directly related to their math performance and experiences.

Please take a minute to write any information that you think would help me in understanding your child better, and to help him/her achieve greater success in math. The purpose of this is to learn how I can best provide an environment for your child that will enhance his/her ability to learn math.

Include in your considerations (math only):

- *Past successes or difficulties
- *Math anxiety
- *Math Olympiad experience
- *Specific math strengths or weaknesses
- *Math goals
- *Feelings towards math
- *Math work they do outside school (tutored, enrichment, etc.)
- *Past in-school support received

Please have your child return this to **Mr. Hoffman** on **Monday September 14, 2020** or if you **PREFER**, you can simply email your letter to me at HOFFKIDS@gmail.com. Feel free to put this in an envelope to return if you wish. Thank you for your early support.

Sincerely,

Mr. Barry Hoffman

Child's Name: _____
